Vamos Começar

Lists

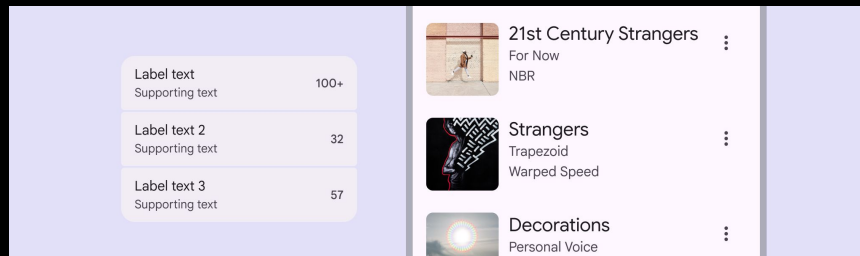

As listas ajudam as pessoas a encontrar um item específico e realizar a ação desejada.

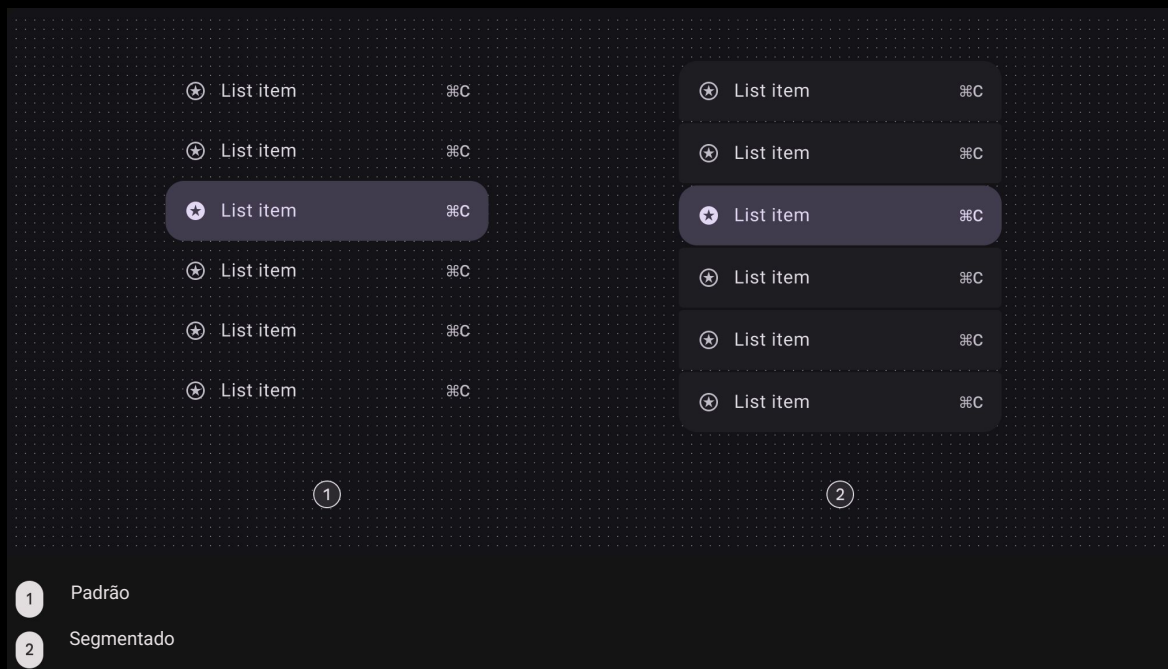

- * Ordene os itens da lista de forma lógica, como alfabética ou numérica.
- * Mantenha os itens curtos e fáceis de visualizar.
- * Exiba ícones, texto e ações em um formato consistente.
- * Escolha entre estilos padrão e segmentado.

Lists

Estilos

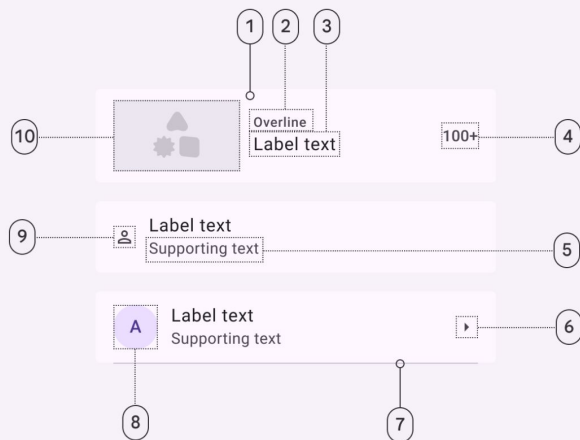

O texto do rótulo de um item da lista, o texto de apoio, a imagem e o ícone final podem ser personalizados para criar diversos tipos de listas.

Lists

Anatomia

1 Container

Obrigatório

2 Overline

3 Label text

Obrigatório

Headline

4 Trailing text

5 Supporting text

6 Trailing icon

7 Divider

8 Leading avatar

9 Leading icon

10 Leading media - image or video

Lists

Exemplo de List Simples

ListsPreview

One line list item with 24x24 icon

```
40 @Composable 1 Usage
41 fun UmalinhaSimples() {
42     Column {
43         HorizontalDivider()
44         ListItem(
45             headlineContent = { Text(text = "One line list item with 24x24 icon") },
46             leadingContent = {
47                 Icon(imageVector = Icons.Filled.Favorite, contentDescription = "Localized description 1")
48             },
49         )
50         HorizontalDivider()
51     }
52 }
```

Lists

Exemplo de Duas Linhas

ListsPreview

Two line list item with trailing
Secondary text

meta

```
54 @Composable 1 Usage
55 fun DuasLinhasSimples(){
56     Column {
57         HorizontalDivider()
58         ListItem(
59             headlineContent = { Text( text = "Two line list item with trailing" ) },
60             supportingContent = { Text( text = "Secondary text" ) },
61             trailingContent = { Text( text = "meta" ) },
62             leadingContent = {
63                 Icon( imageVector = Icons.Filled.Favorite, contentDescription = "Localized description" )
64             },
65         )
66         HorizontalDivider()
67     }
68 }
```

Lists

Exemplo de Três Linhas

ListsPreview

OVERLINE

meta

Three line list item

Secondary text

```
70 @Composable 1 Usage
71 fun TreslinhasComSuporte(){
72     Column {
73         HorizontalDivider()
74         ListItem(
75             headlineContent = { Text(text = "Three line list item") },
76             overlineContent = { Text(text = "OVERLINE") },
77             supportingContent = { Text(text = "Secondary text") },
78             leadingContent = {
79                 Icon(imageVector = Icons.Filled.Favorite, contentDescription = "Localized description")
80             },
81             trailingContent = { Text(text = "meta") },
82         )
83         HorizontalDivider()
84     }
85 }
```

Lists

Exemplo com Clique

ListsPreview

 Item 1
Additional info

1

 Item 2
Additional info

3

 Item 3
Additional info

0

```
87 @Composable
88 fun ItemsComClique() {
89     val counts = remember { mutableStateListOf(0, 0, 0) }
90
91     Column {
92         HorizontalDivider()
93
94         repeat( times = 3) { idx ->
95             ListItem(
96                 modifier = Modifier.clickable { counts[idx]++ },
97                 leadingContent = { Icon( imageVector = Icons.Default.Home, contentDescription = null) },
98                 trailingContent = { Text( text = "${counts[idx]}") },
99                 supportingContent = { Text( text = "Additional info") },
100                 headlineContent = { Text( text = "Item ${idx + 1}") },
101             )
102             HorizontalDivider()
103         }
104     }
105 }
```

Lists
